**Important Note:**

1. In-Sem Examination will be conducted on Moodle platform
2. For TE & BE, In-Sem Examination will be conducted on Unit 1, Unit 2 & Unit 3
3. In-Sem Examination for all classes will be of **30 Marks and 40 minutes duration**. There will be 40 questions (MCQ type for 1 mark each) out of which 30 correctly answered questions will be considered for evaluation.

# Machine Learning Unit Test II

Wednesday 24/02/2021 Time: 2.00pm to 3.00pm Class: BE-Comp II  
MCQs : 10mks Theory: 20 mks Total: 30mks

Name of Student \*

Varun Gole

Roll no \*

BE211

1. What is the purpose of performing cross-validation \*

1 point

- To assess the predictive performance of the models
- To judge how the trained model performs outside the sample on test data
- Both A and B
- None of above

2. \_\_\_\_\_ allows you to rebuild a sample starting from a sparse dictionary of atoms (similar to principal components, but without constraints about the independence). \* 1 point

- Dictionary learning
- Machine Learning
- Both A and B
- None of the above

3. Scikit-learn is considered as the best library for \* 1 point

- Model building
- Evaluation metrics
- Hyper-parameter tuning
- All of the above

4. We use Dimensionality Reduction techniques \* 1 point

a. For there are too many variables/predictors which increase the chances of multi-collinearity  
b. Which increase the chances of over-fitting while model building and these variables become redundant.

- Only a
- Only b
- Both (a) and (b)
- None of above

5. One hot encoding \*

1 point

- Increase the dimensionality of a data set
- Decrease the dimensionality of a data set
- Depends upon the use case
- All of the above

6. Which of the following techniques would perform better for reducing dimensions of a data set? \*

1 point

- Removing columns which have too many missing values
- Removing columns which have high variance in data
- Removing columns with dissimilar data trends
- None of these

7. The most popularly used dimensionality reduction algorithm is Principal Component Analysis (PCA). Which of the following is/are true about PCA? \*

1 point

1. PCA is an unsupervised method
2. It searches for the directions that data have the largest variance
3. Maximum number of principal components  $\leq$  number of features
4. All principal components are orthogonal to each other

- 1 and 2
- 1 and 3
- 2 and 3
- All of the above

8. Under which condition SVD and PCA produce the same projection result? \*

1 point

- When data has zero median
- When data has zero mean
- Both are always same
- None of these

9. Missing values has become a regular part of the modern-day data collection procedure. The main reasons for missing values include-  
1. Error in collection  
2. Error in recording  
3. Non Responsiveness

\* 1 point

- 1 and 2
- 1 and 3
- 1,2 and 3
- None of above

10. The major reasons for performing data preprocessing includes-  
1. Lack of appropriate variables or contains missing values  
2. Inconsistency or Discrepancy in the recorded data  
3. Remove outliers or errors

\* 1 point

- 1 and 2
- 1 and 3
- 2 and 3
- 1,2 and 3

11. Explain Principal Component Analysis (PCA) and its use. \*

4 points

 1 - varun gole.jpeg

12. Explain the criteria or methodology for creation of Training and Testing data sets in machine learning methods

\* 4 points

 2 - varun gole.jpeg

13. State and explain different mechanisms for managing missing features in a dataset.

\* 4 points

 3 - varun gole.jpeg

14. Describe categorical data and its significance in classification problems. \*

4 points

 4 - varun gole.jpeg

15. Explain dictionary learning. State its applications \*

4 points

 5 - varun gole.jpeg

3. 1. What is the purpose of performing cross-validation \*

1 point

*Mark only one oval.*

- To assess the predictive performance of the models
- To judge how the trained model performs outside the sample on test data
- Both A and B
- None of above

4. 2. \_\_\_\_\_ allows you to rebuild a sample starting from a sparse dictionary of atoms (similar to principal components, but without constraints about the independence).

\* 1 point

*Mark only one oval.*

- Dictionary learning
- Machine Learning
- Both A and B
- None of the above

5. 3. Scikit-learn is considered as the best library for \*

1 point

*Mark only one oval.*

- Model building
- Evaluation metrics
- Hyper-parameter tuning
- All of the above

6. 4. We use Dimensionality Reduction techniques

\* 1 point

a. For there are too many variables/predictors which increase the chances of multi-collinearity  
b. Which increase the chances of over-fitting while model building and these variables become redundant.

*Mark only one oval.*

- Only a
- Only b
- Both (a) and (b)
- None of above

7. 5. One hot encoding \*

1 point

*Mark only one oval.*

- Increase the dimensionality of a data set
- Decrease the dimensionality of a data set
- Depends upon the use case
- All of the above

8. 6. Which of the following techniques would perform better for reducing dimensions of a data set? \* 1 point

*Mark only one oval.*

- Removing columns which have too many missing values
- Removing columns which have high variance in data
- Removing columns with dissimilar data trends
- None of these

9. 7. The most popularly used dimensionality reduction algorithm is Principal Component Analysis (PCA). Which of the following is/are true about PCA? \* 1 point
1. PCA is an unsupervised method
  2. It searches for the directions that data have the largest variance
  3. Maximum number of principal components  $\leq$  number of features
  4. All principal components are orthogonal to each other

*Mark only one oval.*

- 1 and 2
- 1 and 3
- 2 and 3
- All of the above

10. 8. Under which condition SVD and PCA produce the same projection result? \* 1 point

*Mark only one oval.*

- When data has zero median
- When data has zero mean
- Both are always same
- None of these

11. 9. Missing values has become a regular part of the modern-day data collection procedure. The main reasons for missing values include- \* 1 point
1. Error in collection
  2. Error in recording
  3. Non Responsiveness

*Mark only one oval.*

- 1 and 2
- 1 and 3
- 1,2 and 3
- None of above

12. 10. The major reasons for performing data preprocessing includes- \* 1 point
1. Lack of appropriate variables or contains missing values
  2. Inconsistency or Discrepancy in the recorded data
  3. Remove outliers or errors

*Mark only one oval.*

- 1 and 2
- 1 and 3
- 2 and 3
- 1,2 and 3

13. 11. Explain Principal Component Analysis (PCA) and its use. \* 4 points

Files submitted:

14. 12. Explain the criteria or methodology for creation of Training and Testing data sets in machine learning methods \* 4 points

Files submitted:

15. 13. State and explain different mechanisms for managing missing features in a dataset. \* 4 points

Files submitted:

16. 14. Describe categorical data and its significance in classification problems. \* 4 points

Files submitted:

17. 15. Explain dictionary learning. State its applications \* 4 points

Files submitted:

# TEIT- OS Unit Test III

Dear Students, solve the following MCQs as per instructions.

- 1) Enter correct email id because you will get copy of you responses on same email id.
- 2) All questions are compulsory.
- 3) Once the test is submitted you will not be allowed to modify the answer.
- 4) There are total 15 questions  
1 mark - 10 questions  
2 marks - 5 questions

Academic Year 2020-21

**\* Required**

1. Name of the Student \*

---

2. Enter Your Roll Number \*

---

1 Mark - 10 Questions

3. 1.A situation where several processes access and manipulate the same data concurrently and the outcome of the execution depends on the particular order in which access takes place is called \_\_\_\_\_ \* 1 point

*Mark only one oval.*

- starvation
- data consistency
- race condition
- aging

4. 2. Which of the following conditions must be satisfied to solve the critical section problem? \* 1 point

*Mark only one oval.*

- All of the mentioned
- Mutual Exclusion
- Progress
- Bounded Waiting

5. 3. Mutual exclusion implies that \_\_\_\_\_ \* 1 point

*Mark only one oval.*

- when another process is in its critical section
- before a process has made a request to enter its critical section
- after a process has made a request to enter its critical section and before the request is granted
- none of the mentioned

6. 4. A minimum of \_\_\_\_\_ variable(s) is/are required to be shared between processes to solve the critical section problem. \* 1 point

*Mark only one oval.*

- one
- two
- three
- four

7. 5. Semaphore is a/an \_\_\_\_\_ to solve the critical section problem. \* 1 point

*Mark only one oval.*

- hardware for a system
- special program for a system
- data
- integer variable

8. 6. What are the two atomic operations permissible on semaphores? \* 1 point

*Mark only one oval.*

- quit
- hold
- stop
- wait

9. 7. If the semaphore value is negative \_\_\_\_\_ \* 1 point

*Mark only one oval.*

- it is invalid
- its magnitude is the number of processes waiting on that semaphore
- no operation can be further performed on it until the signal operation is performed on it
- none of the mentioned

10. 8. What will happen if a non-recursive mutex is locked more than once? \* 1 point

*Mark only one oval.*

- Starvation
- Deadlock
- Aging
- Signaling

11. 9. What are the two kinds of semaphores? \*

1 point

*Mark only one oval.*

- mutex & counting
- counting & decimal
- binary & counting
- decimal & binary

12. 10. Which of the following condition is required for a deadlock to be possible?

\* 1 point

*Mark only one oval.*

- all of the mentioned
- mutual exclusion
- a process may hold allocated resources while awaiting assignment of other resources
- no resource can be forcibly removed from a process holding it

2 Marks - 5 Questions

13. 1. Which of the following is/are the disadvantages of machine instruction approach to enforce mutual exclusion. i) Busy waiting employees ii) hard to verify iii) starvation is possible iv) Deadlock is possible

\* 2 points

*Mark only one oval.*

- i, iii and iv only
- ii, iii and iv only
- i, ii and iii only
- All i, ii, iii and iv

14. 2. State whether the statements are True or False for the operations of semaphore. \* 2 points
- i) A semaphore may be initialized to a non-negative value.ii) The wait operation decrements the semaphore value.iii) The single operation increments the semaphore value.

*Mark only one oval.*

- i and ii
- ii and iii
- i and iv
- All i, ii and iii

15. 3. The bounded buffer problem is also known as \_\_\_\_\_ \* 2 points

*Mark only one oval.*

- Producer – Consumer problem
- Dining – Philosophers problem
- Readers – Writers problem
- None

16. 4. The dining – philosophers problem will occur in case of \_\_\_\_\_ \* 2 points

*Mark only one oval.*

- 6 philosophers and 5 chopsticks
- 4 philosophers and 5 chopsticks
- 5 philosophers and 5 chopsticks
- 3 philosophers and 5 chopsticks

17. 5. A deadlock free solution to the dining philosophers problem

\* 2 points

---

*Mark only one oval.*

- necessarily eliminates the possibility of starvation
- eliminates any possibility of any kind of problem further
- necessarily eliminates the possibility of deadlock
- does not necessarily eliminate the possibility of starvation

1 Mark - 10 Questions

1. A situation where several processes access and manipulate the same data concurrently and the outcome of the execution depends on the particular order in which access takes place is called \_\_\_\_\_

\* 1 point

- starvation
- data consistency
- race condition
- aging

2. Which of the following conditions must be satisfied to solve the critical section problem?

\* 1 point

- All of the mentioned
- Mutual Exclusion
- Progress
- Bounded Waiting

3. Mutual exclusion implies that \_\_\_\_\_ \*

1 point

- when another process is in its critical section
- before a process has made a request to enter its critical section
- after a process has made a request to enter its critical section and before the request is granted
- none of the mentioned

4. A minimum of \_\_\_\_\_ variable(s) is/are required to be shared between processes to solve the critical section problem. \* 1 point

- one
- two
- three
- four

5. Semaphore is a/an \_\_\_\_\_ to solve the critical section problem. \* 1 point

- hardware for a system
- special program for a system
- data
- integer variable

6. What are the two atomic operations permissible on semaphores? \* 1 point

- quit
- hold
- stop
- wait

7. If the semaphore value is negative \_\_\_\_\_ \*

1 point

- it is invalid
- its magnitude is the number of processes waiting on that semaphore
- no operation can be further performed on it until the signal operation is performed on it
- none of the mentioned

8. What will happen if a non-recursive mutex is locked more than once? \*

1 point

- Starvation
- Deadlock
- Aging
- Signaling

9. What are the two kinds of semaphores? \*

1 point

- mutex & counting
- counting & decimal
- binary & counting
- decimal & binary

10. Which of the following condition is required for a deadlock to be possible? \*

1 point

- all of the mentioned
- mutual exclusion
- a process may hold allocated resources while awaiting assignment of other resources
- no resource can be forcibly removed from a process holding it

### 2 Marks - 5 Questions

1. Which of the following is/are the disadvantages of machine instruction approach to enforce mutual exclusion. i) Busy waiting employees ii) hard to verify iii) starvation is possible iv) Deadlock is possible \*

2 points

- i, iii and iv only
- ii, iii and iv only
- i, ii and iii only
- All i, ii, iii and iv

2. State whether the statements are True or False for the operations of semaphore. i) A semaphore may be initialized to a non-negative value. ii) The wait operation decrements the semaphore value. iii) The single operation increments the semaphore value. \*

2 points

- i and ii
- ii and iii
- i and iv
- All i, ii and iii

3. The bounded buffer problem is also known as \_\_\_\_\_ \*

2 points

- Producer – Consumer problem
- Dining – Philosophers problem
- Readers – Writers problem
- None

4. The dining – philosophers problem will occur in case of \_\_\_\_\_ \*

2 points

- 6 philosophers and 5 chopsticks
- 4 philosophers and 5 chopsticks
- 5 philosophers and 5 chopsticks
- 3 philosophers and 5 chopsticks

5. A deadlock free solution to the dining philosophers problem \_\_\_\_\_ \*

2 points

- necessarily eliminates the possibility of starvation
- eliminates any possibility of any kind of problem further
- necessarily eliminates the possibility of deadlock
- does not necessarily eliminate the possibility of starvation

 TC265, TC268, TC269, TC271

Sr. No.	Questions
<b>Blooms Level 01 'Recall'</b>	
<b>Q. 1</b>	<b>Choose</b> Why does architectural design occurs during product design? a) Stakeholders must convinced that their needs will be met, which may be difficult without demonstrating how the engineers plan to build the product

	b) Product designers must judge the feasibility of their designs c) Project planners must have some idea about what software must be built to create schedules and allocate resources d)All of the mentioned (ans: B)
<b>Q. 2</b>	<b>Define</b> architectural Design of a Software system
<b>Q. 3</b>	<b>List</b> the important characteristics of real time software architecture.
<b>Blooms Level 02 'Understand'</b>	
<b>Q. 4</b>	<b>Explain</b> the need of software architecture design.
<b>Q. 5</b>	<b>Describe</b> Component based software architecture?
<b>Q. 6</b>	<b>Explain</b> mutiple client multiple service architectural pattern with a suitable example.
<b>Blooms Level 03 'Apply'</b>	
<b>Q. 7</b>	<b>Demonstrate</b> with an example,Dynamic view of software architecure
<b>Q. 8</b>	<b>Sketch</b> synchronous communication pattern in client server architecure
<b>Q. 9</b>	<b>Illustrate</b> important design principles for service oriented architecture
<b>Blooms Level 04 'Analyse'</b>	
<b>Q. 10</b>	Compare Structural view and dynamic view architecure of software system
<b>Q. 11</b>	Explain port,Provided interfaces and required interfaces with an example.
<b>Q. 12</b>	Examine the functionality of Broker pattern for service oriented architecure
<b>Blooms Level 05 'Evaluate'</b>	
<b>Q. 13</b>	Justify, how it is possible for a component to provide more than one interface.(ans:pg 303 hassan gomma)
<b>Q. 14</b>	Explain object oriented architecture with data abstraction
<b>Blooms Level 06 'Create'</b>	
<b>Q. 15</b>	Design use case diagram,class diagram and communication diagram for the ATM System

Ms. Pradnya Mehta  
Course Coordinator
